DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-25, drawn to a tablet comprising an excipient, a biocide, an enzyme, and enzyme preserving means .

Group II, claim(s) 26, drawn to a method of using a tablet comprising an excipient, a biocide, an enzyme, and enzyme preserving means.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:.

According to PCT Rule 13.2, unity of invention exists only when the shared or corresponding technical feature is a contribution over the prior art. The inventions listed as Groups I-II do not relate to a single general inventive concept because they lack the same or corresponding special technical feature. The technical feature of Group I is the combination of (i) an excipient, (ii) a biocide, (iii) an enzyme, and (iv) an enzyme preserving means, which is shown by Scialla (1994, EP 0 619 367 A1; IDS, reference BA) to lack unity and does not make a contribution over the prior art, because Scialla teaches a composition which may comprise (i) filler (an excipient), for example sodium sulphate (page 3, lines 36-40); (ii) a source of peroxide (a biocide), for example sodium persulphate (page 3, lines 48-58; (iii) an enzyme (page 2, lines

46-49; page 3, ¶2); and (iv) enzyme stabilizers (a preserving means), for example calcium salts (page 3, lines 34-35) or acid/alkali (page 4, lines 14-18).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
